ERP selection

CARE Consulting Services has a clear view on the ERP market and knows which ERP solutions will function suitable to your organisation and sector. We have a knowledge-base of all ERP solutions present in the Benelux with all the strengths of that sector and >6000 features. As business advisors we are aware of all implementors – their limits and strengths. Our ERP selection will guarantee companies and organisations a complete mix of feasibility, functionalities and budget

Request for Proposal

A RFP offers clarity on the requested functionalities. CARE Consulting Services will get everyone on the same line. Contractually we will make sure the RFP will be the criterium to evaluate the project. The RFP will be issued as detailed as requested, on the level of processes, procedures or working instructions.

SAP – MS Dynamics – Oracle assessments

CARE Consulting Services evaluates if the software named by You will fit your organisation and your budget. Our gap/fit analysis results in a tangible budget for license, customisation, parameterisation, implementation and education.

Software purchases

Do we need to inform you that purchasing software licenses, consultancy and implementation services can hold risks for someone who is not familiar with IT ? CARE Consulting Services will review your IT contracts and will balance the rights and duties of your suppliers. We will negotiate for you the best contract conditions to a result based obligation.

SWOT analysis

You are operating in an IT environment and with different platforms and suppliers, but you are unsure about the future-proof of all this. CARE Consulting Services will clear this situation pointing out the Strengths, Weaknesses, Opportunities and Threats and provide realistic advice on the direction to take.

Operational Due Diligence

Your company wishes to take over a competitor or has done so recently. The synergies may seem obvious from a distance, but our service makes them tangible. We will analyse the processes and IT of your competitor and integrate duplicate departments into one. We will train people in the software products and new processes.

IT strategy

Companies and organisations always want to fit their IT projects into a long term strategy. CARE Consulting Services will adapt the long term IT strategy to the business strategy. We will make sure that the internal IT activities will be in line with the strategy.

Business blueprints

Business processes cannot be copied as such into a new ERP environment. CARE Consulting Services will issue a Business Blueprint as a first step to an ERP installation. Our independence guarantees that not only that the software will be satisfactory but most of all the employees and the processes.

Value Discovery

Value Discovery is our service to develop a business case with quantified monetary benefits within various business processes that helps create a value-based strategy for technology deployment.

Value Realisation

With Value Realization we translate your business case into action plans. In this phase CARE Consulting Services establishes the scorecard, the baseline measurements, the insights into leading business process practices and appropriate project governance.

Value Optimization

With Value Optimization CARE Consulting Services identifies how to derive greater benefit from existing investments and reduce the total cost of ownership post-implementation.

Software license contract optimization

We audit the existing SAP, MS Dynamics and Oracle software license contracts to usage right, license price, maintenance, Terms & Conditions and Special or Specific Conditions. CARE Consulting Services decreases the total maintenance fee through re-negotiation and optimization.

Application tests

Software developments and ERP installations only go live after having performed a positive test. CARE Consulting Services tests are being discussed, documented, carried out and improvements will be coordinated. We will organise and/or carry out suitable tests in order to limit the going live to a calculated risk.

Project management

Software projects tend to absorb someone's time completely. CARE Consulting Services will have a devoted project manager at your disposal, who will guide and assist the ERP or development projects with all the necessary experience.

Quality management

A software project – whether standard ERP or customised development – often lacks the required quality and does not deliver the expected results. CARE Consulting Services will guarantee that you receive the quality in the project and the results.

IT Coaching

For a company that decides to manage the IT project internally, CARE Consulting Services is available to provide coaching. Our service guarantees that internal opinions and decisions are evaluated and backed by an experienced professional.
