### **SME Strategies**

CARE Consulting Services assists you in setting up or updating your business strategies in production, marketing, personnel, financial structure. Our added value is handing you the best business practices while keeping your situation discrete.

### **KPI Improvements**

All internal operations are measurable and can be improved. Our business advisor helps you select the most profitable KPI's, sets up the reporting method and works with you on the improvement.

### **Business Efficiency**

There is a huge profit gap between companies that organise their operations efficient or not. CARE Consulting Services can advise in organising the company processes in the different department to achieve improvements – financial or otherwise.

### **Cash increase**

Receiving the cash of billed customers often is painstakingly slow. The credit&collection procedure may be the reason, but often the more departments contribute to the problem. CARE Consulting Services removes the sources of these problems and increases your cash receiving.

### **Change management**

IT projects are often not synchronised with the business processes. CARE Consulting Services provides process training to your employees and subcontractors.
